Summary

Full-stack developer skilled in MERN stack and scalable web applications, with experience integrating AI/ML models into real-world systems. Proficient in RESTful APIs, authentication, and building intelligent solutions.

Education

Sahyadri College of Engineering & Management, Mangaluru *Nov 2022 – May 2026*
Bachelor of Engineering in Computer Science; CGPA: 8.4

Government P. U. College, Mudipu, Mangaluru *Jun 2020 – Mar 2022*
Pre-University Education (PCMB); Aggregate: 88.5%

Skills

Languages: C, C++, SQL, JavaScript, Python

Frameworks: React.js, Node.js

Databases: MySQL, MongoDB

Tools: Git, GitHub, Postman, Docker

Libraries: TensorFlow, NumPy, Pandas, Matplotlib, Sklearn

Cloud Platform: AWS

Soft Skills: Agile methodology, Problem Solving, Teamwork, Leadership

Experience

Software Testing Intern, Ukshati Technologies Pvt. Ltd *Jan 2026 – Present*
Performed manual and automated testing on real-time ERP systems using Selenium and Pytest, ensuring reliable and efficient workflows.

Projects

AI Travel Planner *May 2025*

- Tools & Technologies: React.js, Node.js, Express.js, MongoDB, OpenRouter API, JWT, REST APIs.
- Developed a MERN-based AI travel planner that generates personalized itineraries from user inputs using the OpenRouter LLM API, with cost estimation, weather insights, recommendations, and PDF export.
- Implemented secure user authentication and MongoDB storage for AI-generated plans, enabling trip history tracking and plan management.

Smart Email Agent *Nov 2025*

- Tools & Technologies: React.js, Node.js, Express.js, MongoDB, Gmail API, OpenRouter LLM, FastAPI, scikit-learn, Node-Cron, Axios.
- Built an intelligent email assistant to automate inbox management, reducing manual email handling and improving response efficiency through conversation analysis.
- Implemented AI-powered thread summarization, action-item extraction, context-aware reply drafting, and automated follow-up reminders to ensure timely responses on high-priority emails.

Diabetic Retinopathy Grader *Dec 2025*

- Tools & Technologies: Python, TensorFlow, Streamlit, OpenCV, scikit-learn, pandas, NumPy.
- Created a deep learning pipeline to classify diabetic retinopathy from retinal fundus images using TensorFlow with preprocessing and phased training.
- Added Grad-CAM based explainability and deployed inference through a Streamlit app for quick, interpretable predictions.

Achievements

- Secured 2nd Prize at CodeBlaze Hackathon (SYNERGIA) for an accessible banking interface with biometric authentication for users with disabilities.
- Participated in Techvision-2025 (Idea Presentation & Project Expo), Sahyadri College of Engineering, presenting “Automated Quality Assessment System for Grape Selection”.

Activities

- Conducted an awareness and learning session for 50+ students under the National Service Scheme (NSS) to promote education and social responsibility.
